DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/7/08 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-12, 14-20, and 22-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Riley et al. (4,231,568).

Riley et al. shows the claimed invention where a double pulley (42) has a first groove into which cable (46) and a second variable spiral groove (41) where a cable is engaged in the spiral groove and has a spring (44); Riley et al. states in column 4, lines 16-20:

“As in the case of the cam-pulley combination of FIGS. 2-3, the slope of the grooves of the spiral pulley 41 is selected according to art-recognized techniques to compensate for the variations in the force required to extend the spring at various points from its fully relaxed to its fully extended position.”

The grooves are connected by being attached through the hub.

Response to Arguments

4. Applicant's arguments with respect to claims 1-12, 14-20, and 22-23 have been considered but are moot in view of the new ground(s) of rejection.
